

Preparation COBIT® 5 Implementation

COBIT 5 is the latest edition of ISACA's globally accepted framework. It provides an end-to-end business view of the governance of enterprise IT, reflecting the central role of information and technology in creating value for enterprises of all sizes. This COBIT 5 Implementation training provides guidance to executives and those charged with making decisions concerning the use of technology in support of organizational objectives. COBIT 5 helps business leaders address the needs of all stakeholders across the enterprise and ultimately maximize the value from information and technology.

Why take this COBIT 5 Implementation training?

Get a practical understanding of how to apply COBIT 5 to specific business problems, pain points, trigger events and risk scenarios within the organization. Learn how to effectively implement and apply COBIT 5 into your enterprise or how you can integrate components into client initiatives. Attendees will walk away with an appreciation of how to effectively use COBIT 5 for different organizational and or client scenarios.

What you will learn

On successful completion of this COBIT 5 Implementation training, students will be able to apply the COBIT 5 good practice continual improvement lifecycle approach to GEIT, tailored to suit the needs of a specific enterprise. In particular:

- How to analyze enterprise drivers
 - Implementation challenges, root causes and success factors
 - How to determine and assess current process capability
 - How to scope and plan improvements
 - Potential implementation pitfalls
 - The latest good practices.
-
