Preparation COBIT® 5 Foundation

This COBIT® Foundation training course provides an overview the main concepts of IT Governance according to ISACA latest governance framework, and how they can be applied. The COBIT framework assists enterprises create optimal value from IT by maintaining a balance between realizing benefits and optimizing risk levels and resource use. This framework enables IT to be governed and managed in a holistic manner for the entire enterprise, taking in the full end-to-end business and IT functional areas of responsibility, considering the IT-related interests of internal and external stakeholders. This course and the certificate are mandatory for additional training, including the Implementation course and Assessor Program training.

Why take this COBIT 5 Foundation training?

In this interactive course, you will learn about the need for an IT governance framework and how COBIT addresses this need by providing the latest insights into enterprise-wide governance of IT. Using a logical and example-driven approach, you will cover the elements and supporting materials of the COBIT framework. Obtaining the COBIT 5 Foundation certification will show that you have sufficient knowledge and understanding of the COBIT 5 guidance to be able to:

- Understand the governance and management of enterprise IT
- Create awareness with your business executives and senior IT management
- Assess the current state of enterprise IT in your department or organization
- Scope which aspects of COBIT 5 would be appropriate to implement.

Who should attend?

Business Management, IT /IS Auditors, Internal Auditors, Information Security and IT Practitioners; Consultants, IT/IS Management looking to gain an insight into the Enterprise Governance of IT and looking to be certified as a COBIT Implementer or Assessor.
